

THE JAS SHOULDER

SUPERIOR DESIGN, PROVEN OUTCOMES

The JAS shoulder offers full range, multi-plane Range of Motion (ROM) therapy - 135° abduction, 100° external rotation, and 90° internal rotation - now in a lightweight, portable, body - cuff design. An innovative scapular stabilization feature, combined with infinitely adjustable ROM, assures precise capsular stretch throughout the entire ROM. Maximal Total End Range Time (TERT) is achieved for optimal therapeutic benefit.

HIGH-PERFORMANCE SOLUTIONS FOR ROM RECOVERY

Full-Range, Multi-Plane Shoulder ROM Therapy

Easy to Fit Simple to Use

NEW! Body Cuff Allows Patient Mobility

Swing Arm Feature - Positions Arm in Scapular Plane

The new JAS Shoulder body - cuff design offers patients mobility, is simple to fit, and can be used in a seated or lying position. A unique swing-arm feature allows the patient to apply therapeutic stretch in the scapular plane.

The proven JAS stress relaxation approach delivers permanent gains in ROM with just three 30-minute sessions per day – patient controlled, pain - free therapy for optimal results.

JAS Shoulder

- 100° External Rotation
- 90° Internal Rotation
- 135° Abduction
